

THE HIP LITTLE GARDEN

FREE LOG

Greenhouse Temperature Log

Track temperature, humidity, ventilation, shade, and seasonal changes so you can quickly spot patterns in greenhouse conditions.

Daily Environment Readings

Record morning and evening greenhouse conditions and note anything unusual affecting plant performance.

Date	AM Temp	PM Temp	AM Humidity	PM Humidity	Vent Opened?	Shade Used?	Watering	Plant Response / Notes

Quick Daily Checks

Use these boxes for the small things that often affect greenhouse success.

- ☐ Ventilation adjusted as needed
- ☐ Soil or growing media moisture checked
- ☐ Fans / airflow running normally
- ☐ Shade cloth or cover checked
- ☐ Pests or mildew monitored
- ☐ Plants not showing heat stress

DAILY NOTES

What changed today? Note overheating, cold nights, drafts, condensation, or sudden plant stress.

Greenhouse Conditions Summary

Summarize weekly patterns, maintenance needs, and the plant responses that matter most as the season changes.

Weekly Greenhouse Summary

Use this page for review so you can make adjustments before small issues become big ones.

Week / Date	Avg Temp / Range	Humidity Trend	Ventilation Notes	Shade / Cover	Watering Pattern	Plant Response / Action

Maintenance & Seasonal Adjustments

Track the practical changes that improve airflow, temperature control, and plant comfort.

- ☐ Cleaned glazing / panels for better light
- ☐ Checked door and vent function
- ☐ Adjusted fan or heater settings
- ☐ Added or removed shade cloth
- ☐ Protected against overnight cold
- ☐ Changed watering routine for the season

BIGGEST TAKEAWAY

What condition caused the most plant stress this week, and what will you change next?
