

THE HIP LITTLE GARDEN

FREE TRACKER

Hydroponic Maintenance Tracker

Record pH, nutrient changes, water temperature, and equipment checks so your system stays stable and productive.

Water Quality & System Readings

Use one line per day or per check depending on how often you monitor your system.

Date	pH	EC / TDS	Water Temp	Water Level	Top-Off	Nutrients Added	System Check	Notes

Equipment Checklist

Confirm the equipment pieces that most affect root health and nutrient delivery.

- ☐ Pump running normally
- ☐ No clogs in lines or emitters
- ☐ Grow lights positioned correctly
- ☐ Air stone / aeration working
- ☐ Reservoir covered from light
- ☐ No leaks or overflow risks

OBSERVATION BOX

Note root color, leaf changes, algae, odor, or any unusual shifts in solution clarity.

Hydroponic System Review

Track nutrient changes, cleaning, and crop response so you can improve your hydroponic routine over time.

Reservoir Change Log

Use this for full changes, partial changes, or major nutrient adjustments.

Date	Change Type	pH After	EC / TDS After	Water Temp After	Nutrients / Additives	Notes / Plant Response

Cleaning & Maintenance

Use these checks to keep the system clean, oxygenated, and consistent.

- ☐ Reservoir cleaned
- ☐ Pump intake cleaned
- ☐ Algae removed
- ☐ Lines / fittings checked
- ☐ Net cups or media checked
- ☐ Calibration checked on meters

NEXT ADJUSTMENT

Based on your logs, what one change should you test next in your hydroponic system?
